

## What do countries really need to drive policy change in cancer?

Join this session to gain an understanding of the development of cancer policies. The experts will discuss the key elements of a needs assessment for cancer policies, the main steps involved in drafting a cancer policy, and their own experiences and challenges of implementing cancer policies in their respective settings. In this session, you will also learn how to evaluate the performance of a policy or plan and to make informed decisions to improve comprehensive cancer care in your community.
